- 1 How did the evaluation help?
- 2 What do we as a group have to change on our posters and why?
- 3 How can we work better as a group?
- 4 (What) was the message clear on the posters?
- 5 Which poster that my presented had the most appeal?

1. The evaluation elaborated in the library with the professors Dick, Ruth and Maura help us to choose the three poster that we are going to print on a big paper. The professors said us topics about what we need to change of each poster and we recognize it.

2 We need to change the ortography of some posters because is wrong. also, they said us that we need to finish the bactground of some poster and (to) finish of paint the details of each poster.

3 I consider that we need <sup>more</sup> (most) organization to get a better performance and efficace of the work because without organization we will get a bad work.

4 When the teachers reviews all the posters, they said us that the message of each poster was clearly except the poster about the world without water. The message of each one is save or conserve water.

5 The poster that most appeal for the public is the poster about a drop and saying "why do you waste me?" and in the end says: conserve water. The drop is showing a toilet. We choose that because the colors of the posters are very strong and the message is very clear.
