

## SanDisk® SecureAccess™ for Mac users

Mac users will need to download and install the SanDisk SecureAccess software for their SanDisk® USB flash drives. An Internet connection is required.

### Steps:

1. After reading the following steps, click on the 'Ready to Download' button below.
2. Follow the on-screen instructions, download and save the compressed file onto your computer.
3. Before installing the SanDisk SecureAccess software, connect your SanDisk USB flash drive to the computer.
4. Extract the SanDisk SecureAccess file for Mac directly onto your connected SanDisk USB flash drive.
5. Click on the SanDisk SecureAccess icon on your computer screen to begin.

### Minimum System Requirements:

- Mac OS® X v10.5+
