

Professional development training

In the training area you can access professional development courses designed specifically for Cambridge teachers and school leaders. We offer the following types of online course:

Tutor-guided

Collaboration and reflection are key to effective learning. Under the guidance of an experienced Cambridge tutor, teachers will be working closely with other teachers to develop their understanding and share ideas and experiences.

By the end of these tutor guided courses teachers will be equipped with a range of concepts and tools for application in their teaching, and will have developed personal insights into their own teaching practices – and the practices of their international colleagues.

All of our tutor-guided courses cover the same ideas and materials as the equivalent face-to face course.

Self-study

Our self-study training is designed to give teachers a brief introduction to their specific Cambridge syllabuses or coursework component. The training is self-study so teachers can learn at their own pace and around their schedule. Teachers will have access to this course for 90 days starting from the day when they first access the course.

Although there is no tutor, there are a number of online resources to give teachers support and guidance throughout the course.

You can book your place using the course catalogue below or on the [Events and training calendar](#).

Available courses

Getting Started with Assessment for Learning

This course aims to introduce you to assessment for learning, and help you to understand how to apply assessment for learning in your teaching practice. During the course we will examine the following questions:

What is assessment for learning?

What does effective assessment for learning look like?

How does assessment for learning apply to my own practice?

What is my action plan?

How do I know that including assessment for learning in my classes made a positive impact?
