

Training

Online courses

We provide two types of introductory online course for teachers who are new to Cambridge Primary.

Tutor-guided

Collaboration and reflection are key to effective learning. Under the guidance of an experienced Cambridge tutor, teachers will be working closely with other teachers to develop their understanding and share ideas and experiences.

By the end of these tutor-guided courses teachers will be equipped with a range of concepts and tools for application in their teaching, and will have developed personal insights into their own teaching practices – and the practices of their international colleagues.

Our tutor-guided courses cover the same ideas and materials as the equivalent face-to-face course.

To find out more and book, go to:

[Cambridge Primary English \(0844\)](#)

[Cambridge Primary Mathematics \(0845\)](#)

[Cambridge Primary Science \(0846\)](#)

Self-study

Our self-study training is designed to give a brief overview of the programme and guides you through the materials provided. The course includes exercises to help you implement Cambridge Primary in your school. The course is available to all registered schools free of charge. Details on how to access the course are available in the [*Introduction to Cambridge Primary*](#) brochure and are also sent to your Cambridge Primary Coordinator when your school registers with the programme.

Face-to-face training

We provide the following face-to-face courses:

- Introductory Training – to help you to get started with Cambridge Primary.
- Extension Training – to help you develop a deeper understanding of Cambridge Primary.
- Enrichment Professional Development Workshops – to help you to transform your classroom practice and raise the quality of teaching and learning in your school.

These courses will be advertised on the [Events and training calendar](#) on our website.
